LE THANH PHAT

SOFTWARE ENGINEER | FULL-STACK & DEVOPS

Ho Chi Minh City, Vietnam | 0968 295 944 | phat30102002@gmail.com | github.com/Lenal-P

PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience building, deploying and maintaining web applications for HRM, CRM, education and import-export operations. Work across frontend, backend and DevOps, with strong React, Next.js, TypeScript, NestJS, FastAPI and PostgreSQL experience. Comfortable taking features from development through deployment, monitoring and production support.

CORE SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, MUI, Ant Design, Tailwind CSS, Redux Toolkit, responsive UI, i18n
Backend: NestJS, Node.js, Express, FastAPI, REST APIs, Socket.IO, JWT/SSO, RBAC, multi-tenant architecture
Databases: PostgreSQL, MySQL, MongoDB, Redis, TypeORM, schema design and database migrations
DevOps: Docker, Docker Compose, Linux, Git/GitLab, CI/CD, Nginx, environment configuration, deployment and production support

PROFESSIONAL EXPERIENCE

Software Engineer | Innotech Vietnam — 2024 - Present

Ho Chi Minh City, Vietnam

- Deliver enterprise products across HRM, CRM, education and import-export, contributing to frontend, backend, databases, deployment and production operations.
- Build React/Next.js interfaces and NestJS/FastAPI services with REST APIs, PostgreSQL/MySQL, TypeORM/SQLAlchemy, JWT/SSO, RBAC, multi-tenancy, i18n and real-time communication.
- Leverage advanced AI tools to automate debugging, optimize code generation, and significantly accelerate the software development lifecycle and overall engineering productivity.
- Implement HRM workflows for employee records, attendance, leave/WFH, payroll, allowances, contracts, e-sign approvals, tasks and reminders across connected web and mobile systems.
- Maintain Docker-based environments and CI/CD workflows, manage configuration and database migrations, support releases, and troubleshoot deployment and production issues.
- Mentor interns through onboarding, task planning, technical guidance and code reviews; participate in intern interviews, evaluate technical fundamentals and provide hiring feedback.

SELECTED PROJECTS

KingWork HRM Platform — 2024 - Present

- A business operations platform that helps companies manage employees and sales activities in one place. HR teams can handle attendance, leave/WFH, payroll, allowances, contracts, approvals and tasks, while sales teams manage leads, deals, quotations, invoices and reports. I developed and maintain features the HRM systems.
  Technology: React, Next.js, TypeScript, NestJS, PostgreSQL, TypeORM, MUI, Ant Design, Docker

GEXIM / Import-Export AI Platform — 2026

- A digital import-export platform that helps businesses manage customs procedures and reduce manual document processing. Users can track shipments, prepare declarations, look up HS codes and taxes, verify C/O documents and check import-export records. I developed web and API features and integrated AI document extraction, legal search and chat.
  Technology: Next.js, TypeScript, FastAPI, PostgreSQL, Qdrant, Redis, Docker

Ellacy Education and Scholarship Platform — 2025

- An education and scholarship platform connecting students, universities and education agents. Students can manage profiles and applications, while universities and agents manage applicants, staff, campaigns and questionnaires. I implemented these workflows, bilingual interfaces, permissions, notifications and AI chat.
  Technology: React, TypeScript, Ant Design, NestJS, PostgreSQL, TypeORM, Socket.IO, OpenAI, LangChain, Docker

Spec2s Multi-Agent Software Engineering Platform — 2026

- An AI-assisted software engineering platform that turns business requirements into SRS documents, UI mockups, system architecture, database designs and starter code. I contributed administration, permissions, user/credit management, billing, reports and file-upload features across the micro-frontend and microservice system.
  Technology: React, TypeScript, Webpack Module Federation, NestJS, FastAPI, LangGraph, Redis, Qdrant, Docker
